SHAYAZATH KHAN R

Python Backend Developer | Full Stack Developer | AI/LLM Applications

Bangalore, Karnataka, India | +91 6374042861 | Shayazathkhan@gmail.com | Know shayaz

PROFESSIONAL SUMMARY

Python Backend Developer with hands-on production experience building and maintaining HRMS SaaS platforms, attendance and payroll systems, candidate management workflows, REST APIs, authentication, and real-time services. Strong experience with Python, Flask, FastAPI, SQLAlchemy, MySQL/AWS Aurora, Redis, Celery, Docker, Linux and AWS. Experienced in designing complex attendance, shift, leave, payroll and employee-management business rules; integrating React/Next.js and React Native clients; implementing OTP with Amazon SNS, push notifications with Firebase, geofencing, real-time location tracking, and production debugging. Also experienced with AI/LLM integrations, API security, Git-based development, and CI/CD and cloud infrastructure.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS
Backend: Flask, FastAPI, Django, Node.js, REST APIs, SOAP APIs, OpenAPI/Swagger, Postman
Python & Architecture: SQLAlchemy ORM, JWT Authentication, RBAC, API Security, Business Logic, Backend System Design
Databases: MySQL, PostgreSQL, MongoDB, AWS Aurora RDS, TIDB Cloud Database Design, Query Optimization
Async & Real-Time: Celery, Celery Beat, Redis, WebSockets, Socket.IO, Kafka
Frontend & Mobile: React.js, Next.js, React Native, Expo, Tailwind CSS
Cloud & DevOps: AWS EC2, S3, RDS/Aurora, Docker, Linux, Nginx, Gunicorn, Systemd, Terraform, GitHub Actions
AI / Generative AI: LLM Integration, Faster-Whisper, Speech-to-Text, OpenAI, Gemini, Prompt Engineering, AI Agents
Integrations: Amazon SNS, Firebase FCM, Stream, Video SDK, Agora, Payment/Third-Party API Integration
Engineering: Debugging, Production Troubleshooting, Logging, Testing, CI/CD, Code Review, Agile Collaboration

PROFESSIONAL EXPERIENCE

Python Backend Developer | I2Global Virtual Learning / PPLSync HRTech | Bangalore, India | Jun 2025 – Present

- **Backend Development:** Develop and maintain production-grade applications using Python, Flask, FastAPI, SQLAlchemy, MySQL, and AWS Aurora.
- **Tech Stack:** Python, Flask, FastAPI, SQLAlchemy, MySQL, AWS, React, Next.js, React Native, Tailwind CSS, Redis, Celery, Docker, Linux, Nginx, Terraform, and GitHub Actions.
- **Business Logic:** Designed and implemented complex business logic, workflow automation, data validation, authentication, authorization, and backend processing for scalable SaaS applications.
- **AI Integration:** Integrated OpenAI APIs into web applications and implemented AI-powered capabilities in candidate-facing applications.
- **Third-Party Integrations:** Integrated OpenAI APIs for AI-powered capabilities, Firebase Cloud Messaging (FCM) for push notifications, and Amazon SNS for OTP delivery, and third-party services such as Agora and GetStream for real-time communication and chat functionalities.
- **Scheduling & Automation:** Implemented Google Cloud Scheduler and cron-based scheduling workflows for automated notifications and background tasks.
- **Full-Stack Development:** Developed and maintained REST APIs and contributed to web and mobile application development using React, Next.js, and React Native.
- **Performance & Deployment:** Optimized database queries and API performance, resolved production issues, and worked with AWS infrastructure, Docker, Linux, Nginx, Terraform, and GitHub Actions.

Intern | VCodez | Chennai, India | Feb 2025 – Jun 2025

- Developed responsive web interfaces using React, JavaScript and Django, with focus on usability and API-driven application workflows.
- Integrated frontend applications with backend REST APIs and collaborated on data exchange between client-side and server-side components.
- Worked with MySQL-backed Django applications and contributed to debugging, feature development and application testing.

PROJECTS

AI Speak to Text – AI-Powered Transcription Platform | Python, FastAPI, faster-whisper, Next.js, TypeScript, SQLAlchemy, TiDB Cloud, Google Cloud Run, Vercel

- Developing an AI-powered speech-to-text platform with real-time microphone transcription, audio file transcription, automatic language detection, and support for English, Hindi, and mixed-language speech.
- Built a FastAPI backend integrating faster-whisper for speech recognition, with WebSocket-based live transcription and editable transcript previews.
- Implemented transcript management workflows for saving, editing, and viewing transcription history using SQLAlchemy and TiDB Cloud.
- Deployed the backend on Google Cloud Run and the Next.js frontend on Vercel, with environment-based configuration and cross-origin access controls.

PPLSync HRMS & Attendance Platform | Python, Flask, FastAPI, SQLAlchemy, MySQL/Aurora, Redis, Celery, AWS, Docker, React/Next.js, React Native

- Production HRMS SaaS platform covering employee management, candidate management, attendance, leave, payroll, shifts, regularization, live tracking, authentication and organization controls. Implemented and maintained core backend workflows and integrations.

EntrySync Attendance System | Python, Flask, SQLAlchemy, Firebase FCM, Geofencing, Real-Time Location

- Developed backend workflows for attendance capture, punch validation, shift rules, grace periods, geolocation/geofencing, mobile punch controls and punch-out reminder notifications.

Adaptive Refinement in Circular Yeast Production Systems | React, Django, MySQL, REST APIs

- Built an internship web application with React frontend, Django backend, MySQL database and REST APIs.

MyOne – Study Materials Mobile App | React Native, Node.js, Socket.IO, MongoDB

- Developing a mobile application for sharing study materials with real-time communication capabilities.

Notes Web Application | Django, Python, MySQL, JavaScript

- Built a web-based notes application with Django, MySQL and JavaScript APIs.

EDUCATION

Bachelor of Computer Applications (BCA) – 2025 | The New College, Chennai, Tamil Nadu

• Gold Medal, Academic Achievement Award – Second Year.

• Silver Medal, Academic Achievement Award – First Year.

• Leader of Department Union; Mentor of Department classes.

ADDITIONAL STRENGTHS

• Strong production debugging and root-cause analysis across application, database, infrastructure and third-party integration layers.

• Experience translating client/business requirements into backend rules, APIs, database changes and deployable features.

• Comfortable working across backend, frontend, mobile, cloud infrastructure and QA/testing workflows.
